

# Which Animal Am I?

## Across

4. It is an animal that is born white but turns pink due to the algae and shrimp it eats.
11. It is an arthropod with the widest leg span, and its length can reach up to 4 meters.
12. The only bird that can fly backwards.
13. It is the only animal on Earth where the males give birth.
14. It is the only animal that cannot jump.
15. It is an animal whose tongue weighs more than that of a small elephant.

## Down

1. It is an animal with fingerprints that are very similar to human ones, and even under a microscope, distinguishing them is difficult.
2. This creature makes a sound as loud as a chainsaw when it vocalizes. It also has a body part that acts as a built-in earplug by completely covering the ear canals to protect ear health.
3. It is a creature with eyes larger than its brain and capable of killing a human with a single kick.
5. It is actually a lagomorph, but is often mistakenly believed to belong to the rodent family.
6. It is a marine creature that contains tetrodotoxin, which can kill about 30 people, and has no known antidote.

7. It is the heaviest animal that lives in a tree.
8. It is a creature capable of detecting a single drop of blood in approximately 100 liters of water and can smell blood from 5 kilometers away.
9. According to the WHO, it is the creature that carries diseases such as malaria, dengue fever, and yellow fever, causing approximately 725,000 deaths annually.
10. This rodent, whose teeth continuously grow, uses tree branches and trunks to file them down.
